Jose Ruiz

Software Engineer | Indianapolis, IN

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in web development. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100 devs, Los Angeles, CA

December 2022- PRESENT

- Collaborated with a team of developers to build modern and responsive web applications using best practices.
- Built semantically structured full stack web applications.
- Collaborated effectively with cross-functional teams of developers to design and build feature-rich front-end and back-end web applications. Utilized MongoDB, Express, React, and Node.js.
- Applied Agile methodologies, including SCRUM, to efficiently manage projects and foster collaboration.

Recent Projects:

Guess the Word– Word game allows for KG grade students to practice required sight words in an interactive and fun way to stimulate word repetition. Rather than flash cards and boring studying time, the game makes required practice fun.

What should I eat? – Users can browse through preassigned sections or search for other ideas. Once a user is able to find a dish that sounds delicious, they can click on the recipe for cook instructions and ingredients.

Full Stack Web Developer at JR Consulting | Bloomington, IN

June 2021 — Present

- Developed full stack web applications and static websites for small and medium sized businesses.
- Collaborated closely with clients to gather requirements, understand their business needs, and translate them into effective technical solutions. Built semantically structured full stack web applications that were modern and responsive that used best practices.
- Ensured timely project delivery and maintained effective communication throughout the development process to exceed client expectations

Project Manager at Cook Medical | Bloomington, IN

July 2016 - Present

- Provide support for the daily and strategic activities associated with market regulatory projects. Regulatory intelligence expert communicating and supporting market updates.
- Liaison between customer and strategic cross-functional teams. Ensure successful delivery of solutions according to customer needs and business strategy.
